

Count to 120

- Have students start counting at 1 and count as far as they can go
- When they make a mistake, correct them and help them practice the decade they missed
 - ◆ For example, your student counts to 32 and then skips to 35. Stop them and have them practice counting with you from 30 - 40
- If student is proficient in counting orally, have them practice writing numbers in order
- If student can count from 1, have them try to start on other numbers
 - ◆ For example, count to 102 but start at 87
